DynaResource Overview

A Junior Gold Producer Poised for Optimization and Growth

San Jose de Gracia - Flagship High-Grade Gold and Silver Mine

- District scale project consisting of 33 contiguous concessions totaling over 10,000 ha
- Historical project with first gold discovery in 1828 and artisanal mining of bonanza grade zones dating back to 1892 with modern exploration commencing in the 1990s
- Small scale gold producer with 8 years operating history

Located in the World Class Mining District of Mexico

- Located 100km northeast of Guamuchil in Sinaloa State, Mexico
- In the center of the Sierra Madre Occidental geological zone which has produced over 25Moz of gold since 2010
- Property and can be accessed via secondary road or by gravel airstrip

Operational Overview

- Production has grown from 10,000 gold ozs per year (100 tpd) in 2016 to ~25,000 gold ozs (800 tpd)
- Conventional cut and fill mining followed by crushing, grinding and flotation to produce a high value gold concentrate which is transported to Manzanillo
- 100% offtake agreement with Ocean Partners

Geography and Mineralization

- The project includes highly prospective geology and a historic mineral resource estimate of approximately 1.1M oxs of gold which suggests a significant mine life even under conservative resource conversion conditions and considering mine depletion
- All mining concessions were converted in 2006 into 50-year mining concessions
