DynaResource Inc. 100% owns and operates the high-grade San Jose de Gracia gold-silver mine located in Sinaloa State, Mexico, in the center of the **Sierra Madre Occidental belt**.

The Mine has been in **operation for 9 years** with **production reaching 25,500 gold ozs** (800 tpd) in 2024. Conventional cut and fill mining is used followed by crushing, grinding and flotation to produce a high value gold concentrate.

The district scale San Jose de Gracia land package consists of **33 contiguous concessions totaling over 10,000 ha**. The **historic Mineral Resource Estimate of approximately 1.1M ounces** of gold suggests a **significant mine life** even under conservative resource conversion conditions and considering mine depletion. The majority of the land package remains unexplored.

The Project has a long history in the region with the first gold discovery in 1828 and artisanal mining of bonanza grade zones dating back to 1892 with modern exploration commencing in the 1990s.
